

TIBI Type of Leased Service for Networx Service CSAs Due for release 05-June-2009

A new search option has been added to the TIBI Inventory section to filter the Networx CSAs by the type of leased service. This search option will display for all customers but will only filter for Networx CSAs. The type of leased service for Networx CSAs will display on each of the results listing pages (TSR/CSA/PDC) as well as on the CSA details page. Each of the screen shots below show an example of each page that has been updated to process the type of leased service option. **Data displayed in screen shots is development data **

The current and proposed future telcos identified for the Networx Services are as follows:

NXUV – Verizon *
NXUA – AT&T **
NXUQ – Qwest **
NXEV – Verizon **
NXEA – AT&T **
NXEQ – Qwest **
NXEL – Level **
NXES – Sprint **

* *Current active telco for Networx Services – can be found in TIBI*

** *Future telcos for Networx Services*

- The type of leased service is a drop-down option with all the valid types of leased services that are available for selection from DDOE when inputting a TSR.

General Information

TSR: CSA: Telco Prefix Type Circuit Suffix

PDC: CCSD: CCIR: Acct Mgr:

Type Leased Service:

TFS - Switched Only
VS - Long Distance (Prev PIC) - Switched Only
VS - Post-paid Calling Card
VS - Pre-paid Calling Card**Location****Bandwidth****Date Ranges**[Search](#)[Clear](#)

- The type of leased service will display, for Networkx Service CSAs only at this time, on each of the results listing pages in the Inventory section of TIBI. The pages are TSR, CSA, and PDC. Below are screen shots to show where the service will be displayed. If when filtering by other options and non-Networkx CSAs are displayed, the type of leased service will be blank for those non-Networkx CSAs. It will only display for Networkx CSAs.

 ++ CSA's with multi-point locations  = Dispute									

- The type of leased service will display on the CSA details page, again only for Networkx CSAs. If a CSA is does not have a telco value of the above valid Networkx telcos, then the type of leased service will be blank. Below is a screen shot of the CSA details page with the type of leased service

displayed. It is in the first detail section directly below the TCO code.
